

Pandae Modular Workstations offers custom-made efficiency

MODULAR WORKSTATIONS

- Saving you Time & Money
- Improving Productivity
- Increasing Staff Morale
- 5 year Lease to Own
- Maintenance Programme

The workshop plays a critical part in the efficiency and profitability of your business, and it is therefore essential that it is designed right the first time. As the original innovator of the innovative new integrated modular workshop workstations, Pandae boasts unrivalled experience and expertise in delivering flexible and design-led solutions tailored to your business.

There are many factors involved in providing a first-class quality service and one of the most important is your customers' reliance on your expertise. Pandae Storage Solutions creates the best working environment for your professional tasks through its range of modular workbenches and workstations. Organisation, cleanliness and efficiency come standard. These are factors essential to your success and help to promote your professional image to your clients.

Tailored to your needs

Pandae Storage Solutions specialises in serving the automotive industry, offering custom-made solutions that incorporate a selection of workstation products - from computer cabinets and specialised waste cabinets, to lockers and tool trolleys. All are OEM approved, as well as manufactured and powder coated to their specifications. All services, oil, waste and diagnostics are shared between two technicians. You can be assured of the best design, quality and functionality, all backed by the highest levels of service and local manufacturing quality.

Operating lease/instalment option

The main benefit of the financial lease/instalment sale agreement is that the rental allows for off balance sheet financing. The asset is not capitalised onto the motor dealership's books and they merely have to account for operating expense in their income statement. This means the company's gearing is not affected, while it enjoys the full benefit of the workshop over the term of the rental contract. Backed up by these highest levels of service, Pandae Workshop offers best design, quality and functionality in creating the optimal working environment for companies' professional tasks and promoting their proficient image.

UPGRADE YOUR WORKSHOP for as little as R30 000pm for 20 workbays
